

inFlyte™

The ultimate automated tax determination solution for tax professionals managing VAT, GST, Sales & Use Tax and other indirect taxes within Oracle ERP. Save time and money while offsetting business risk and creating transactional efficiency by deploying inFlyte™ in your business.

inFlyte

Introducing inFlyte™...

inFlyte™ is the only Oracle ERP-specific solution for automated determination of indirect tax for global businesses.

Widely recognised as the best practice option in the Oracle marketplace today, inFlyte™ leverages the powerful standard functionality that already exists within Oracle eBTax and Cloud Tax to meet your tax determination and reporting requirements in 165+ countries around the world.

As inFlyte™ handles the tax determination directly from within Oracle itself, there's no need for costly third-party integrations. This means that you also retain complete visibility and management of your tax data.

What's more, inFlyte™ is powered by a vast wealth of pre-built tax content that is available out-of-the-box.

That means we embark upon every project with a defined solution in place. You will never be expected to define the solution for us, as some other providers expect.

Leveraging our exclusive RapidInstall™ loading process, inFlyte™ is suitable for finance migration and transformation projects, country-by-country upgrades of an existing setup, or as a standalone tax technology project retro-fitting with automation.

ORACLE

What do you get?

inFlyte's™ revolutionary implementation methodology is carried out on a per country basis, with its core design architecture offering true global scalability.

By implementing the solution, your business will enjoy:

Automated tax determination for 165+ countries

inFlyte™ uses rules-based automation to determine and apply indirect taxes in more than 165 countries worldwide.

Uses entirely native Oracle functionality

inFlyte™ is not a third-party solution; it sits entirely within Oracle ERP, utilising its immense native functionality.

Compliance with all global tax reporting requirements

Granular tax data is leveraged to ensure you meet all global indirect tax legislation and liabilities.

A solution maintained by the Oracle experts for tax

With 15 years' experience in automating tax in Oracle, we're perfectly placed to ensure your solution remains compliant.

These are just some of the features and benefits of deploying inFlyte™ to automate tax in Oracle.

Whatever your specific considerations may be, rest assured that inFlyte™ can help.

Tax content for global coverage

Our inFlyte™ solution offers unrivalled coverage. It boasts tax content and logic for almost every tax jurisdiction in the world!

165

Number of countries covered by inFlyte™, allowing truly global tax determination to be automated in Oracle ERP

48

Number of hours it takes us to deliver a working tax solution - it's ready for testing as soon as you'll allow.

100+

Number of global organisations that are currently using inFlyte™ to automate the processing of indirect tax.

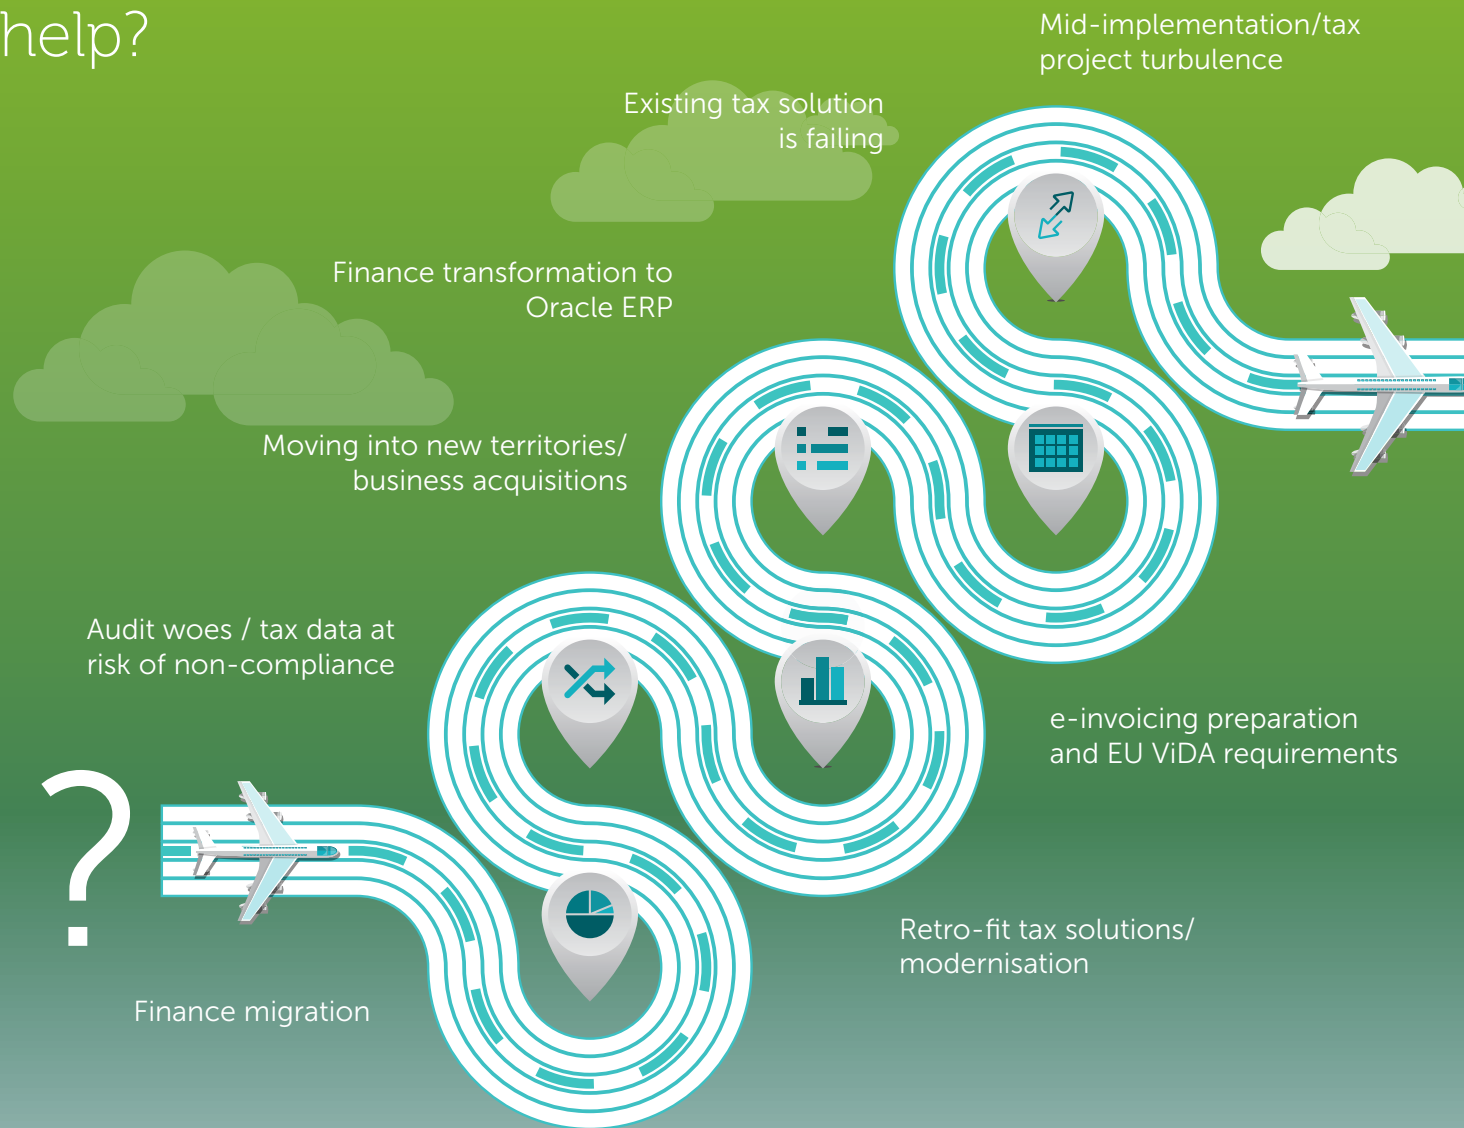

When can inFlyte™ help?

Whether you are planning to integrate a new solution, already mid-implementation or you know something is not right but are not yet sure how to fix it, it's worth exploring inFlyte™.

Our solution works for businesses at all stages of their roadmap and our team can be introduced at any point, either to action an existing roadmap or to arrest a failing solution.

Whatever the circumstances, we'll help you to save money through enhanced efficiency.

So wherever you are on your journey, inFlyte™ is the perfect Oracle solution to transform your tax setup - so get in touch today!

Core functionality

inFlyte™ is the most comprehensive automated Oracle-specific tax determination tool in the world.

Our industry-leading implementation methodology combined with the powerful functionality of the solution makes it a best-in-class solution for even the largest global organisations seeking to manage the most complex transactions and taxes.

Implementation is carried out on a per-country basis and inFlyte's™ core design architecture means it guarantees truly global scalability.

What's more, our team of Oracle experts can support the solution once it's been deployed, giving your business complete peace of mind.

- Global tax determination
- Centralised reporting
- Withholding taxes
- Drop shipments
- Triangulation taxes
- Inco-terms
- Oracle tax localisations
- Tax on purchasing categories
- Specific tax authority requirements

Global Tax Management Report

The Global Tax Management Report is an enhanced VAT/GST reporting package specially for inFlyte™ users working on Oracle R12.

- 1 A single report designed to cover all global VAT and GST requirements
- 2 Includes summary level and line-by-line detail
- 3 Provides 31 additional columns on top of those in a seeded FTR report
- 4 Makes use of standard Oracle reporting processes and reduces the need for localisations
- 5 Included at no extra cost with inFlyte™ solution

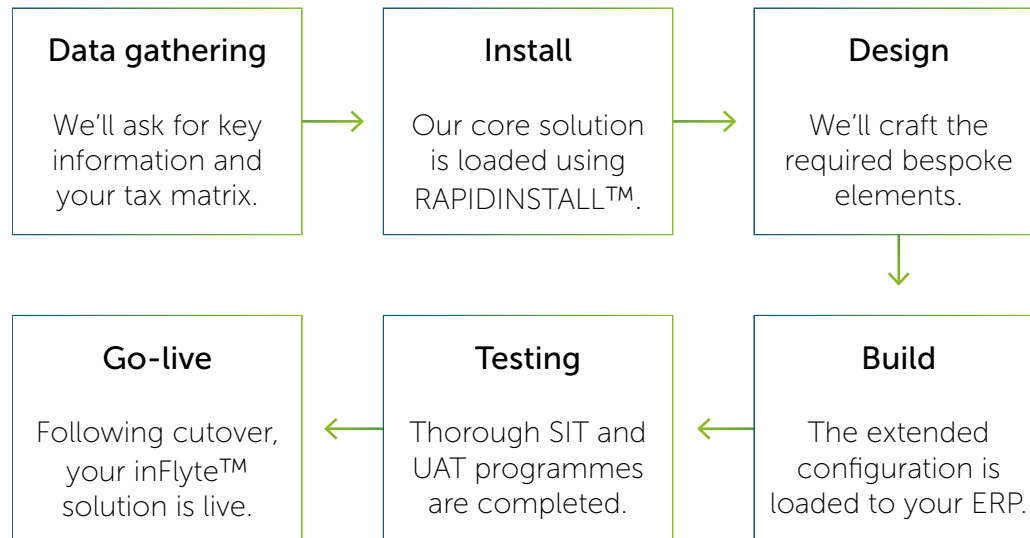

Our implementation methodology

With inFlyte™, we're able to bring a vast repository of tax content to every project. We don't need to start from ground zero each time, nor will we ask you to define the build of your own solution.

Instead, with our pre-built logic, we quickly install the framework of a working tax solution, before our expert consultants work to bring the bespoke elements required to help you meet your specific goals and needs..

The Innovate approach...

RAPIDINSTALL™

RAPIDINSTALL™ is our unique accelerated delivery methodology.

It allows us to speed up any implementation with no loss of precision or power in the solution we deploy.

By leveraging RAPIDINSTALL™, we can deliver:

- 1 A global tax solution ready to test in just 48 hours
- 2 A turbocharged project, speeding through the testing phases.
- 3 More time to focus on bespoke elements.

inFlyte™: The benefits

Pre-built tax logic for 165 countries available out-of-the-box

Leverages Oracle's powerful native functionality - no third-party tools required

Fast, reliable, automated determination for all major indirect taxes

Solution entirely built and delivered under standard Oracle functionality

Pre-built solution means you are not required to define the solution

Specialist support available - no pressure on your IT Team to maintain it!

Why work with us?

inFlyte™ is your foundation. But a good solution is only as good as the process you have to manage it and we're here to help.

Not only do we offer the leading Oracle-specific automated tax solution on the market, we have the experience and expertise required to support you throughout your tax transformation journey through our Support & Maintenance service.

We won't implement a solution and leave you to find your own way. Instead, we'll be by your side for every rate change, regulatory update and new rule for years to come.

We will save you **TIME** at every stage of the project

We achieve this through speed of delivery, speed and accuracy of changes and thorough preparation.

We will save you **MONEY** so your budget goes further

We know the fastest approach to implement a solution in Oracle, so unnecessary billing is low risk.

OUR

ORACLE
CREDENTIALS

Our RapidInstall™ tool allows the quickest and most accurate delivery of our Oracle solutions. Ready for testing as quickly as you allow.

inFlyte™ is our global content and automation solution for indirect tax determination. It currently offers tax content for 165 countries worldwide.

Our Oracle solution is tried and tested across 100+ global clients over the past 15 years. We've got a 100% success rate of delivering projects as promised!

Supporting your solution

Expert support is the only way to ensure any automated tax solution remains accurate, efficient and ultimately compliant.

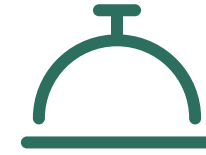

That's why we offer a comprehensive Support & Maintenance service that is designed to ease the burden on your Tax and IT teams and provide an assurance of long-term tax perfection.

Here are just a few of the issues covered by either our Enhanced Support or Maintenance services:

- | | |
|--|---|
|  Tax rate changes |  Correction of user errors |
|  Tax code changes |  ERP faults |
|  Legal changes |  Support non-standard configurations |
|  Maintenance releases |  Support non-standard tax configurations |
|  Bug fixes |  Bespoke upgrades |

SUPPORT SERVICES

Enhanced Support

Enhanced Support gives you the freedom to develop or reconfigure your tax solution with the help of our team of experts exactly when you need us. You'll have an agreed quota of Enhanced Support hours each year to be used as you require.

Maintenance

Our Maintenance service covers all essential updates, upgrades and fixes to your solution and is provided as part of your annual package. This means there is no limit to the number of Maintenance tickets you and your team can raise.

All supported clients also receive access to TwiLyte, our support portal packed with user guides and how-to tips, as well as our quarterly client email bulletin
