

inFlyte™ US

POWERED BY INTX US RATES CONTENT

The ultimate automated tax determination solution for tax professionals managing US Sales & Use Tax within Oracle ERP

Introducing inFlyte™ US...

Our inFlyte™ US solution, powered by INTX US Rates Content, is a tax rates and geography content solution designed to automate determination of US Sales & Use Tax and built specifically for Oracle ERP.

Whether your business is operating Oracle Cloud or Oracle R12, inFlyte™ US can be seamlessly integrated to provide you with a fully-automated US solution; enabling fast and accurate determination to aid compliance in all 50 states - including the five states (Alaska, Delaware, Montana, New Hampshire and Oregon) in which Sales Tax is not imposed but for which you may still be required to manage transactions within Oracle.

Leveraging Oracle ERP's powerful native functionality in conjunction with our comprehensive US Rates Content and a complex set of Oracle configuration rules designed to drive automation empowers businesses to achieve speedy, reliable and cost-effective management of Sales & Use Tax.

Indeed, inFlyte™ US provides users with an assurance of both coverage and compliance; a combination that is difficult to achieve in one of the world's most complex tax markets.

Our US Rates Content is updated on a monthly basis and we also share a monthly report of changes, helping you to stay on top of all the latest rate changes and updates.

How does inFlyte™ US work?

We combine our flagship inFlyte™ solution with monthly US Rates Content to create a comprehensive tax determination tool for certain types of businesses.

inFlyte™ US

Our award-winning Oracle-specific solution is deployed to automate tax determination across the US based on dozens of complex factors.

INTX US Rates Content

Our comprehensive rates file contains tens of thousands of Sales & Use Tax rates - all updated and loaded monthly into your Oracle ERP.

Automated Sales & Use Tax determination across 50 states; underpinned by automated rules and remarkable rates coverage.

The upload process: How US Rates Content is added to your inFlyte™ solution in Oracle ERP

1

We acquire Sales & Use Tax rates via government portals and other official sources

2

You receive access to our dedicated portal for accessing the latest rates file

3

We complete the first two rates file uploads to your system before handing over to you

4

You enjoy automated Sales & Use Tax determination within your Oracle ERP

5

You receive a monthly file update and report detailing all the latest rate changes across the US

Is inFlyte™ US right for your business?

We're always honest and upfront with every business we speak to about inFlyte™ with INTX US Rates Content that it's not the perfect fit for every organisation.

Some smaller companies may find that manual determination in the US still works, while the largest businesses or those with industry-specific requirements will likely require an external/third-party tax engine.

We'll happily point you in the right direction if either of these scenarios apply to your firm.

But for the thousands of businesses that find themselves somewhere between manual processes and a tax engine, inFlyte™ US can be a practical, wide-reaching and cost-effective solution.

inFlyte™ US with INTX US Rates Content could be a perfect match for your business if you meet some or all of the following criteria:

Your business model can be handled within Oracle

You only require determination on a state, county and city level

Your customers and suppliers remain relatively consistent each month - no frequent changes or regular acquisitions

Most of your sales are made B2B

Many of your sales are exempt from Sales Tax, many purchases are raw materials or for domestic consumer use

Managing Sales & Use Tax in the US

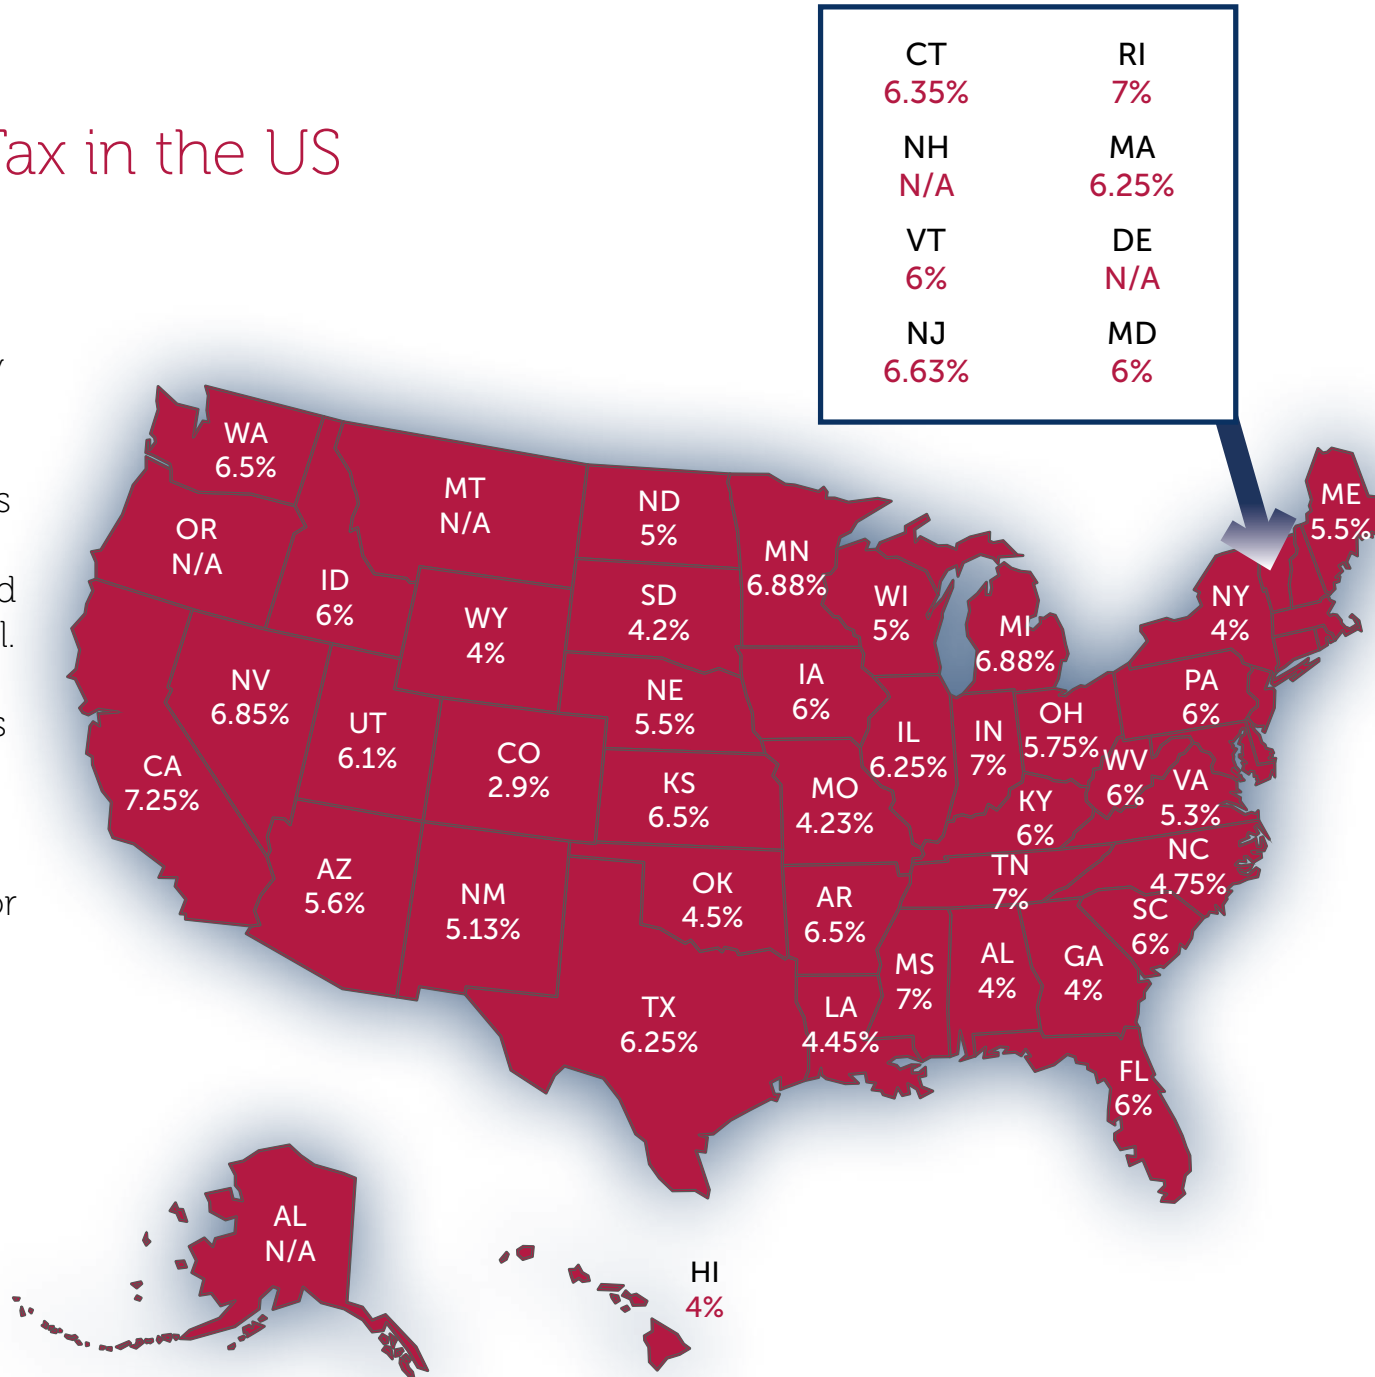

Managing Sales & Use Tax in the US is one of the toughest assignments for any modern tax professional.

Not only do 45 of the country's 50 states apply Sales & Use Tax on a state level (as shown on our map), the tax is also added at county, district, city and ZIP code level.

That's before you consider different rates for types of goods, industries and more.

With such a vast quantity of rates available, determining the correct one for each transaction manually can be near-impossible for global businesses.

Not only does our solution reliably automate determination, it effectively processes **destination and origin-based** state rules to ensure you comply with both.

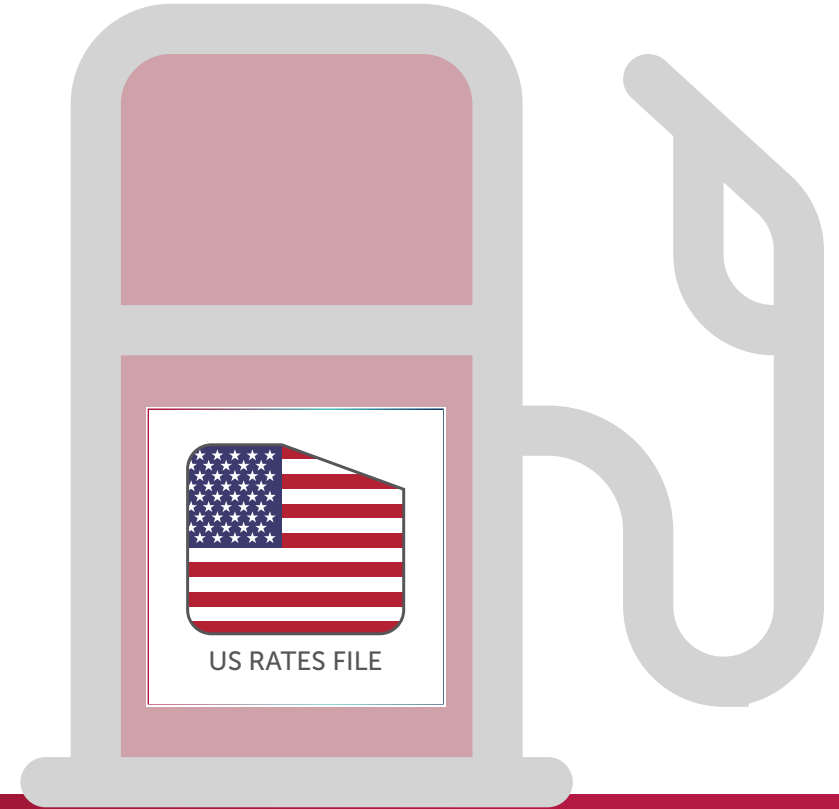

Leveraging the power of Oracle

We're long-time advocates of the extraordinary power and potential of Oracle's native tax engine.

That's why we designed and developed inFlyte™ US and INTX US Rates Content with Oracle ERP in mind; every feature and function is configured to work hand-in-hand with your ERP.

Your Oracle ERP provides the mechanics - our US Rates Content is the fuel to drive you towards the most cost-effective and lowest-risk Sales & Use Tax determination solution on the market for Oracle ERP customers.

OUR

ORACLE
CREDENTIALS

Our RapidInstall™ tool allows the quickest and most accurate delivery of our Oracle solutions. Ready for testing as quickly as you allow.

inFlyte™ is our global content and automation solution for indirect tax determination. It currently offers tax content for 165 countries worldwide.

Our Oracle solution is tried and tested across 100+ global clients over the past 15 years. We've got a 100% success rate of delivering projects as promised!

Manual v automated Sales Tax determination

Whether your business is expanding or moving to Oracle ERP for the first time, it must evolve from managing tax manually to implementing best-in-class automated solutions.

We designed inFlyte™ US with INTX US Rates Content to transform the way companies that fit the target profile of our solution operate in the US; providing accessible, affordable automation that delivers time and cost savings.

But how does it compare to managing US Sales & Use Tax manually?

If your business still relies on manual processes, it's worth considering the significant operational benefits that come from investing in inFlyte™ US.

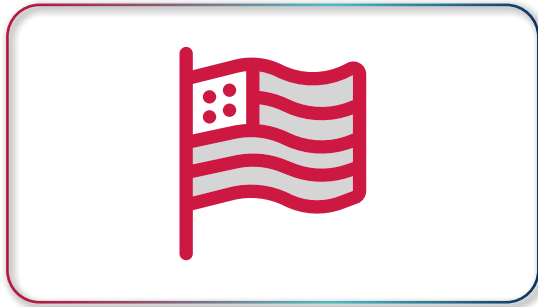

MANUAL PROCESSES

AUTOMATION - POWERED BY US RATES CONTENT

Basic, Oracle-based setup required	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Domestic US, B2B transactions	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
